## Introduction

2018 Annual Disability Status Report	2
ACS Disability Questions	3
Notes	4

## Summary

Illinois Summary	5
Prevalence by State: Ages 21 to 64	7
Employment by State: Ages 21 to 64	8

## Demographics

Prevalence: All Ages	9
Prevalence: Ages 4 and under	11
Prevalence: Ages 5 to 15	13
Prevalence: Ages 16 to 20	15
Prevalence: Ages 21 to 64 (Working-Age)	17
Prevalence: Ages 65 to 74	19
Prevalence: Ages 75 and Older	21
Prevalence: Gender and Age	23
Prevalence: Hispanic / Latino Origin and Age	26
Prevalence: Race	29

## Outcomes

Employment	29
Not Working but Actively Looking for Work	33
Full-Time / Full-Year Employment	35
Annual Earnings (Full-Time / Full-Year Workers)	37
Annual Household Income	39
Poverty	41
Supplemental Security Income (SSI)	43
Education: High School Diploma / Equivalent	45
Education: Some College / Associate's Degree	47
Education: Bachelor's Degree or More	49
Veterans Service-Connected Disability	51
Health Insurance Coverage	53
Type of Health Insurance Coverage	55

## Glossary

## About the Disability Status Report

# The 2018 Annual Disability Status Report

The Annual Disability Status Reports provide policy makers, disability advocates, reporters, and the public with a summary of the most recent demographic and economic statistics on the non-institutionalized population with disabilities. They contain information on the population size and disability prevalence for various demographic subpopulations, as well as statistics related to employment, earnings, household income, veterans' service-connected disability and health insurance. Comparisons are made to people without disabilities and across disability types. Disability Status Reports and other statistics are available for the United States overall, each state, the District of Columbia, and Puerto Rico at [www.disabilitystatistics.org](http://www.disabilitystatistics.org).

The Status Reports primarily look at the working-age population because the employment gap between people with and without disabilities is a major focus of government programs and advocacy efforts. Employment is also a key factor in the social integration and economic self-sufficiency of working-age people with disabilities.

The information in this report is based on data from the US Census Bureau's American Community Survey (ACS) - a survey sent each year to a random sample of over 3.5 million households. For more information see the Census Bureau's ACS website <http://www.census.gov/acs/www/> and our Guide to Disability Statistics from the American Community Survey (2008 Forward): <http://disabilitystatistics.org/sources.cfm>.

The estimates in these reports are based on responses from a sample of the population and may differ from actual population values because of sampling variability and other factors. Differences observed between the estimates for two or more groups may not be statistically significant.

# ACS Disability Questions

There is no single accepted definition of disability. Different definitions and disability questions may identify different populations with disabilities and result in larger or smaller estimates.

Below are the six questions used in the ACS to identify persons with disabilities. Note that the Census Bureau refers to each of the individual types as "difficulty" while in this report the term "disability" is used.

## **Hearing Disability** (asked of all ages):

- Is this person deaf or does he/she have serious difficulty hearing?

## **Visual Disability** (asked of all ages):

- Is this person blind or does he/she have serious difficulty seeing even when wearing glasses?

## **Cognitive Disability** (asked of persons ages 5 or older):

- Because of a physical, mental, or emotional condition, does this person have serious difficulty concentrating, remembering, or making decisions?

## **Ambulatory Disability** (asked of persons ages 5 or older):

- Does this person have serious difficulty walking or climbing stairs?

## **Self-Care Disability** (asked of persons ages 5 or older):

- Does this person have difficulty dressing or bathing?

## **Independent Living Disability** (asked of persons ages 15 or older):

- Because of a physical, mental, or emotional condition, does this person have difficulty doing errands alone such as visiting a doctor's office or shopping?

## **Note:**

- The "Any Disability" category used in this report includes persons who reported one or more of the individual disability types.
- Respondents could report more than one disability type.
- Some disability questions were not asked of children.
- A separate set of survey questions identify veterans with service-connected disabilities. Based on a separate set of survey questions, this report includes estimates related to veterans' service-connected disability (see page 51).

# Notes

**Spanish Language Reports:** Spanish language versions of the Annual Disability Status Reports for the US, all 50 states, Puerto Rico, and Washington D.C. can be downloaded at the same location as the English Status Reports. The Spanish translation was made possible through funding from the Northeast ADA Center through a grant from NIDILRR National Institute on Disability, Independent Living, and Rehabilitation Research

**Puerto Rico:** A Puerto Rico Disability Status Report, based on the parallel 2018 Puerto Rico Community Survey (PRCS), is available again this year in English as well as Spanish. However, please note that the Puerto Rico sample is not included in any U.S. population estimates included in these reports.

**Group Quarters:** In 2006, the ACS began surveying the group quarters population. We include the non-institutionalized group quarters population, but due to small state level sample sizes exclude the institutionalized group quarters population (see glossary) in the Disability Status Reports.

**Margin of Error (MOE):** As in previous years' reports we provide the 90% MOE to better illustrate sampling variability. See the glossary entry for more information on this topic.

**Glossary:** As in previous years, we provide a comprehensive glossary at the back of this report defining the terms used in the Disability Status Report.

Note: According to the Census Bureau, estimates based on the ACS Public Use Microdata Sample (PUMS) file such as those included in this report may differ slightly from the ACS summary tables produced by the Census Bureau, because they are subject to additional sampling error and further data processing operations. Please see <http://www.disabilitystatistics.org/faq.cfm#Q4> for further information.

# Illinois Summary

These statistics indicate the social and economic status of non-institutionalized people with disabilities in Illinois, using data from the 2018 American Community Survey (ACS).

**Age:** In 2018, the prevalence of disability in IL was:

- 11.0 percent for persons of all ages
- 0.4 percent for persons ages 4 and under
- 4.7 percent for persons ages 5 to 15
- 5.3 percent for persons ages 16 to 20
- 8.8 percent for persons ages 21 to 64
- 23.0 percent for persons ages 65 to 74
- 43.5 percent for persons ages 75+

**Disability Type:** In 2018, the prevalence of the six disability types among persons of all ages in IL was:

- 2.1% reported a Visual Disability
- 2.9% reported a Hearing Disability
- 6.1% reported an Ambulatory Disability
- 4.3% reported a Cognitive Disability
- 2.4% reported a Self-Care Disability
- 5.1% reported an Independent Living Disability

**Gender:** In 2018, 11.5 percent of females of all ages and 10.5 percent of males of all ages in IL reported a disability.

**Hispanic/Latino:** In 2018, the prevalence of disability among persons of all ages of Hispanic or Latino origin in IL was 6.4 percent.

**Race:** In IL in 2018, the prevalence of disability for working-age people (ages 21 to 64) was:

- 8.4 percent among Whites
- 14.2 percent among Black / African Americans
- 3.2 percent among Asians
- 15.6 percent among Native Americans
- 8.0 percent among persons of some other race(s)

**Employment:** In 2018, the employment rate of working-age people (ages 21 to 64) with disabilities in IL was 38.0 percent.

**Looking for Work:** In IL in 2018, the percentage actively looking for work among people with disabilities who were not working was 9.5 percent.

**Full-Time/Full-Year Employment:** In IL in 2018, the percentage of working-age people with disabilities working full-time/full-year was 22.8 percent.

**Annual Earnings:** In 2018, the median annual earnings of working-age people with disabilities working full-time/full-year in IL was \$43,600.

**Annual Household Income:** In IL in 2018, the median annual income of households with working-age people with disabilities was \$47,600.

**Poverty:** In IL in 2018, the poverty rate of working-age people with disabilities was 26.7 percent.

**Supplemental Security Income:** In 2018, the percentage of working-age people with disabilities receiving SSI payments in IL was 19.2 percent.

**Educational Attainment:** In 2018, the percentage of working-age people with disabilities in IL:

- with only a high school diploma or equivalent was 32.7 percent
- with only some college or an associate degree was 32.9 percent
- with a bachelor's degree or more was 17.2 percent.

**Veterans Service-Connected Disability:** In 2018, the percentage of working-age civilian veterans with a VA determined Service-Connected Disability was 21.7 percent in IL.

**Health Insurance Coverage:** In 2018 in IL, 93.0 percent of working-age people with disabilities had health insurance.

# Prevalence: Ages 21 - 64

This summary lists percentages by state of non-institutionalized working-age (ages 21 to 64) people with disabilities using data from the 2018 American Community Survey (ACS). The US disability prevalence rate for this population was 10.4%

# Prevalence

## All Ages

### Introduction

This section addresses the prevalence of disability among non-institutionalized people of all ages in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

### Quick Statistics

Prevalence:  
All Ages  
**11.0%**

- In 2018, the overall percentage (prevalence rate) of people with a disability of all ages in IL was 11.0 percent.
- In other words, in 2018, 1,383,300 of the 12,582,500 individuals of all ages in IL reported one or more disabilities.
- In IL in 2018, among the six types of disabilities identified in the ACS, the highest prevalence rate was for "Ambulatory Disability," 6.1 percent. The lowest prevalence rate was for "Visual Disability," 2.1 percent.

# Prevalence of disability among non-institutionalized people of all ages in Illinois in 2018\*

Disability Type	%	MOE	Number	MOE	Base Pop.	Sample Size
Any Disability	11.0	0.20	1,383,300	25,450	12,582,500	123,631
Visual	2.1	0.09	261,300	11,590	12,582,500	123,631
Hearing	2.9	0.11	368,900	13,710	12,582,500	123,631
Ambulatory	6.1	0.16	719,800	18,880	11,823,900	117,000
Cognitive	4.3	0.14	508,700	16,010	11,823,900	117,000
Self-Care	2.4	0.10	278,900	11,970	11,823,900	117,000
Independent Living	5.1	0.16	522,200	16,220	10,224,200	102,478

\* **Note:** Children under the age of five were only asked about Vision and Hearing disabilities. The Independent Living disability question was only asked of persons aged 16 years old and older.

# Prevalence

## Ages 4 years and under

### Introduction

This section focuses on the prevalence of disability among non-institutionalized children ages 4 and under in Illinois, using data from the 2018 American Community Survey (ACS). Only the two sensory disability questions were asked of this population. For definitions of terms, see Glossary.

### Quick Statistics

Prevalence:  
Ages 4 and  
under

**0.4%**

- In 2018, the overall percentage (prevalence rate) of children with a visual and/or hearing disability ages 0 to 4 in IL was 0.4 percent.
- In other words, in 2018, 3,200 of the 758,600 children ages 0 to 4 in IL reported one or more disabilities.
- In IL in 2018, 0.3 percent reported a "Visual Disability"
- In IL in 2018, 0.3 percent reported a "Hearing Disability"

# Prevalence of disability among non-institutionalized people ages 4 and under in Illinois in 2018

Disability Type	%	MOE	Number	MOE	Base Pop.	Sample Size
Any Disability	0.4	3.29	3,200	1,300	758,600	6,631
Visual	0.3	3.29	2,100	1,060	758,600	6,631
Hearing	0.3	3.29	2,500	1,140	758,600	6,631

# Prevalence

## Ages 5 to 15 years

### Introduction

This section focuses on the prevalence of disability among non-institutionalized children ages 5 to 15 in Illinois, using data from the 2018 American Community Survey (ACS)\*. For definitions of terms, see Glossary.

### Quick Statistics

Prevalence:  
Ages 5 to  
15 years  
**4.7%**

- In 2018, the overall percentage (prevalence rate) of children with a disability ages 5 to 15 in IL was 4.7 percent.
- In other words, in 2018, 82,700 of the 1,760,300 individuals ages 5 to 15 in IL reported one or more disabilities.
- In IL in 2018, among the five types of disabilities\* identified in the ACS, the highest prevalence rate was for "Cognitive Disability," 3.5 percent. The lowest prevalence rate was for "Ambulatory Disability," 0.5 percent.

\* **Note:** The "Independent Living Disability" question was not asked of children ages 15 years and younger.

## Prevalence of disability\* among non-institutionalized people ages 5 to 15 in Illinois in 2018

Disability Type	%	MOE	Number	MOE	Base Pop.	Sample Size
Any Disability	4.7	0.37	82,700	6,570	1,760,300	16,076
Visual	0.7	3.29	12,100	2,520	1,760,300	16,076
Hearing	0.6	3.29	10,800	2,380	1,760,300	16,076
Ambulatory	0.5	3.29	8,600	2,120	1,760,300	16,076
Cognitive	3.5	0.32	62,100	5,700	1,760,300	16,076
Self-Care	0.9	3.29	16,600	2,950	1,760,300	16,076

\* **Note:** The "Independent Living Disability" question was not asked of children ages 15 years and younger.

# Prevalence

## Ages 16 to 20 years

### Introduction

This section focuses on the prevalence of disability among non-institutionalized people ages 16 to 20 in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

### Quick Statistics

Prevalence:  
Ages 16 to  
20 years  
**5.3%**

- In 2018, the overall percentage (prevalence rate) of people with a disability ages 16 to 20 in IL was 5.3 percent.
- In other words, in 2018, 44,000 of the 827,200 individuals ages 16 to 20 in IL reported one or more disabilities.
- In IL in 2018, among the six types of disabilities identified in the ACS, the highest prevalence rate was for "Cognitive Disability," 3.9 percent. The lowest prevalence rate was for "Hearing Disability," 0.5 percent.

## Prevalence of disability among non-institutionalized people ages 16 to 20 in Illinois in 2018

Disability Type	%	MOE	Number	MOE	Base Pop.	Sample Size
Any Disability	5.3	0.57	44,000	4,800	827,200	7,803
Visual	0.8	3.29	6,200	1,810	827,200	7,803
Hearing	0.5	3.29	3,900	1,430	827,200	7,803
Ambulatory	0.7	3.29	6,200	1,800	827,200	7,803
Cognitive	3.9	0.48	31,900	4,090	827,200	7,803
Self-Care	0.7	3.29	5,400	1,690	827,200	7,803
Independent Living	2.1	0.36	17,700	3,050	827,200	7,803

# Prevalence

## Ages 21 to 64 years

### Introduction

This section focuses on the prevalence of disability among non-institutionalized working-age people (ages 21 to 64) in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

### Quick Statistics

Prevalence:  
Ages 21 to  
64 years

**8.8%**

- In 2018, the overall percentage (prevalence rate) of working age people (ages 21 to 64) with a disability in IL was 8.8 percent.
- In other words, in 2018, 646,600 of the 7,310,700 individuals ages 21 to 64 in IL reported one or more disabilities.
- In IL in 2018, among the six types of disabilities identified in the ACS, the highest prevalence rate was for "Ambulatory Disability," 4.3 percent. The lowest prevalence rate was "Hearing Disability," 1.6 percent.

## Prevalence of disability among non-institutionalized people ages 21 to 64 in Illinois in 2018

Disability Type	%	MOE	Number	MOE	Base Pop.	Sample Size
Any Disability	8.8	0.24	646,600	17,950	7,310,700	70,205
Visual	1.8	3.29	128,800	8,180	7,310,700	70,205
Hearing	1.6	3.29	118,300	7,840	7,310,700	70,205
Ambulatory	4.3	0.17	315,000	12,700	7,310,700	70,205
Cognitive	3.8	0.16	274,400	11,870	7,310,700	70,205
Self-Care	1.6	3.29	119,100	7,870	7,310,700	70,205
Independent Living	3.3	0.15	242,500	11,180	7,310,700	70,205

# Prevalence

## Ages 65 to 74 years

### Introduction

This section explores the prevalence of disability among non-institutionalized people ages 65 to 74 in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

### Quick Statistics

Prevalence:  
Ages 65 to 74  
years

**23.0%**

- In 2018, the overall percentage (prevalence rate) of people with a disability ages 65 to 74 in IL was 23.0 percent.
- In other words, in 2018, 258,900 of the 1,126,700 individuals ages 65 to 74 in IL reported one or more disabilities.
- In IL in 2018, among the six types of disabilities identified in the ACS, the highest prevalence rate was for "Ambulatory Disability," 14.0 percent. The lowest prevalence rate was for "Visual Disability," 4.0 percent.

# Prevalence of disability among non-institutionalized people ages 65 to 74 in Illinois in 2018

Disability Type	%	MOE	Number	MOE	Base Pop.	Sample Size
Any Disability	23.0	0.91	258,900	11,540	1,126,700	13,652
Visual	4.0	0.43	45,600	4,880	1,126,700	13,652
Hearing	7.6	0.57	86,100	6,700	1,126,700	13,652
Ambulatory	14.0	0.75	158,000	9,050	1,126,700	13,652
Cognitive	4.7	0.45	52,500	5,240	1,126,700	13,652
Self-Care	4.0	0.42	44,700	4,840	1,126,700	13,652
Independent Living	7.3	0.56	81,900	6,540	1,126,700	13,652

# Prevalence

## Ages 75 and Older

### Introduction

This section focuses on the prevalence of disability among non-institutionalized people ages 75 and older in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

### Quick Statistics

Prevalence:  
Ages 75 and  
Older

**43.5%**

- In 2018, the overall percentage (prevalence rate) of people with a disability ages 75 and older in IL was 43.5 percent.
- In other words, in 2018, 347,900 of the 799,000 individuals ages 75 and older in IL reported one or more disabilities.
- In IL in 2018, among the six types of disabilities identified in the ACS, the highest prevalence rate was for "Ambulatory Disability," 29.0 percent. The lowest prevalence rate was for "Visual Disability," 8.3 percent.

## Prevalence of disability among non-institutionalized people ages 75 and older in Illinois in 2018

Disability Type	%	MOE	Number	MOE	Base Pop.	Sample Size
Any Disability	43.5	1.27	347,900	13,330	799,000	9,264
Visual	8.3	0.71	66,400	5,890	799,000	9,264
Hearing	18.4	0.99	147,300	8,740	799,000	9,264
Ambulatory	29.0	1.16	232,100	10,940	799,000	9,264
Cognitive	11.0	0.80	87,900	6,770	799,000	9,264
Self-Care	11.7	0.82	93,100	6,970	799,000	9,264
Independent Living	22.0	1.06	176,100	9,550	799,000	9,264

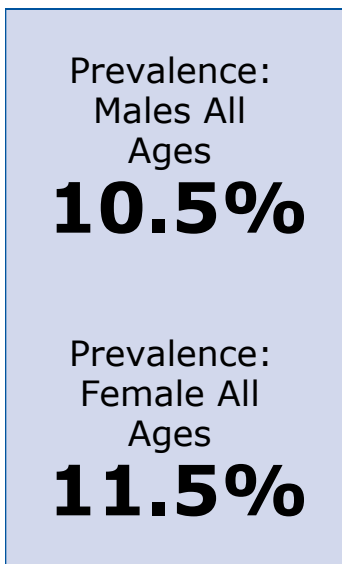

# Prevalence

## Gender and Age

### Introduction

This section examines the prevalence of disability among people by gender and age group in Illinois, using data from the 2018 American Community Survey (ACS)\*. For definitions of terms, see Glossary.

### Quick Statistics

- In IL in 2018, the overall percentage (prevalence rate) of males with a disability of all ages was 10.5 percent.
- In other words, in 2018, 646,300 of the 6,165,200 males of all ages in IL reported one or more disabilities.
- In IL in 2018, the overall percentage (prevalence rate) of females with a disability of all ages was 11.5 percent.
- In other words, in 2018, 737,100 of the 6,417,200 females of all ages in IL reported one or more disabilities.

\* **Note:** Children ages 0-4 were only asked about visual and hearing disabilities, children ages 5-15 were not asked the "Independent Living Disability" question.

# Prevalence of disability among non-institutionalized people by gender and age group in Illinois in 2018

Gender & Age	%	MOE	Number	MOE	Base Pop.	Sample Size
<b>Males</b>

\* **Note:** Children ages 0-4 were only asked about visual and hearing disabilities, children ages 5-15 were not asked the "Independent Living Disability" question.

# Prevalence

## Hispanic/Latino Origin and Age

### Introduction

This section examines the prevalence of disability among people by Hispanic/Latino origin and age group in Illinois, using data from the 2018 American Community Survey (ACS)\*. For definitions of terms, see Glossary.

### Quick Statistics

Prevalence:  
Hispanic All  
Ages

**6.4%**

Prevalence:  
Non-Hispanic  
All Ages

**12.0%**

- In IL in 2018, the overall percentage (prevalence rate) of disability among people of Hispanic/Latino origin of all ages was 6.4 percent.
- In other words, in 2018, 140,500 of the 2,195,300 people of Hispanic/Latino origin of all ages in IL reported one or more disabilities.
- In IL in 2018, the overall percentage (prevalence rate) of disability among people of non-Hispanic/Latino origin of all ages was 12.0 percent.
- In other words, in 2018, 1,242,900 of the 10,387,100 people of non-Hispanic/Latino origin of all ages in IL reported one or more disabilities.

\* **Note:** Children ages 0-4 were only asked about visual and hearing disabilities, children age 5-15 were not asked the "Independent Living Disability" question.

# Prevalence of disability among non-institutionalized people by Hispanic / Latino origin and age group in Illinois in 2018

Hispanic/Latino Origin & Age	%	MOE	Number	MOE	Base Pop.	Sample Size
<b>Hispanic</b>						
Hispanic - All Ages	6.4	0.38	140,500	8,540	2,195,300	15,267

Non-Hispanic - Ages 21-64	9.4	0.27	569,800	16,910	6,076,200	61,589
Non-Hispanic - Ages 65-74	23.4	0.95	242,900	11,190	1,039,700	12,886
Non-Hispanic - Ages 75+	44.0	1.31	331,300	13,020	752,500	8,865

\* **Note:** Children ages 0-4 were only asked about visual and hearing disabilities, children ages 5-15 were not asked the "Independent Living Disability" question.

# Prevalence

## Race

### Introduction

This section presents the disability prevalence rate among non-institutionalized working-age people (ages 21 to 64) by race category in IL, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

### Quick Statistics

In 2018, among working-age people in IL:

- 8.4 percent of persons who were White reported a disability.
- 14.2 percent of persons who were Black/African American reported a disability.
- 15.6 percent of persons who were Native American reported a disability.
- 3.2 percent of persons who were Asian reported a disability.
- 8.0 percent of persons who were some other race(s) reported a disability.

# Prevalence of disability among non-institutionalized working-age people (ages 21 to 64) by race in Illinois in 2018

Race	%	MOE	Number	MOE	Base Pop.	Sample Size
White	8.4	0.28	439,800	14,930	5,253,400	55,850
Black/African American	14.2	0.80	143,900	8,640	1,010,900	6,628
Native American or Alaska Native	15.6	6.10	2,900	1,230	18,600	172
Asian	3.2	0.60	14,800	2,780	459,200	3,719
Some other race(s)	8.0	0.82	45,300	4,870	568,600	3,836

# Employment

## Introduction

This section examines the employment rates of non-institutionalized working-age people (ages 21 to 64) with disabilities in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

## Quick Statistics

Employment:  
with disability  
**38.0%**

Employment:  
without  
disability  
**80.7%**

- In 2018, the employment rate of working-age people with disabilities in IL was 38.0 percent.
- In 2018, the employment rate of working-age people without disabilities in IL was 80.7 percent.
- The gap between the employment rates of working-age people with and without disabilities was 42.7 percentage points.
- Among the six types of disabilities identified in the ACS, the highest employment rate was for people with a "Hearing Disability," 55.4 percent. The lowest employment rate was for people with a "Self-Care Disability," 17.4 percent.

# Employment of non-institutionalized working-age people (ages 21 to 64) by disability status in Illinois in 2018

Disability Type	%	MOE	Number	MOE	Base Pop.	Sample Size
No Disability	80.7	0.35	5,380,400	40,210	6,664,000	63,496
Any Disability	38.0	1.38	245,900	11,250	646,600	6,709
Visual	43.6	3.17	56,200	5,420	128,800	1,177
Hearing	55.4	3.31	65,600	5,850	118,300	1,261
Ambulatory	26.2	1.79	82,400	6,560	315,000	3,295
Cognitive	29.5	2.00	81,000	6,500	274,400	2,725
Self-Care	17.4	2.52	20,700	3,290	119,100	1,221
Independent Living	19.2	1.83	46,500	4,930	242,500	2,576

# Not Working but Actively Looking for Work

## Introduction

This section focuses on the percentage of non-institutionalized working-age people (ages 21 to 64) with disabilities in Illinois who are not working but actively looking for work, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

## Quick Statistics

Actively  
Looking: with  
disability  
**9.5%**

Actively  
Looking:  
without  
disability  
**20.2%**

- In 2018 in IL, the percentage of working-age people with disabilities who were not working but actively looking for work was 9.5 percent.
- In 2018 in IL, the percentage of working-age people without disabilities who were not working but actively looking for work was 20.2 percent.
- The difference in the percentage of not working but actively looking for work between working-age people with and without disabilities was 10.7 percentage points.
- Among the six types of disabilities identified in the ACS, the highest percentage of not working but actively looking for work was for people with a "Hearing Disability," 13.7 percent. The lowest percentage was for people with a "Self-Care Disability," 3.1 percent.

# Percentage who are not working but actively looking for work among non-institutionalized working-age people (ages 21 to 64) in Illinois in 2018

Disability Type	%	MOE	Number	MOE	Base Pop.	Sample Size
No Disability	20.2	0.81	259,400	11,550	1,283,700	11,892
Any Disability	9.5	1.06	38,000	4,460	400,700	4,183

Independent Living	6.1	1.24	11,900	2,500	196,000	2,085

# Full-Time / Full-Year Employment

## Introduction

This section presents the percentage of non-institutionalized working-age people (ages 21 to 64) with disabilities working full-time/full-year in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

## Quick Statistics

FT / FY  
Employment:  
with disability  
**22.8%**

FT / FY  
Employment:  
without  
disability  
**61.6%**

- In 2018, the percentage of working-age people with disabilities working full-time/full-year in IL was 22.8 percent.
- In 2018, the percentage of working-age people without disabilities working full-time/full-year in IL was 61.6 percent.
- The difference in the percentage working full-time/full-year between working-age people with and without disabilities was 38.8 percentage points.
- Among the six types of disabilities identified in the ACS, the highest full-time/full-year employment rate was for people with "Hearing Disability," 40.1 percent. The lowest full-time/full-year employment rate was for people with "Independent Living Disability," 8.1 percent.

# Full-Time/Full-Year employment of non-institutionalized working-age people (ages 21 to 64) by disability status in Illinois in 2018

Disability Type	%	MOE	Number	MOE	Base Pop.	Sample Size
No Disability	61.6	0.43	4,101,900	38,220	6,664,000	63,496

Independent Living	32.6	3.12	78,900	9,160	242,200	2,571

\* **Note:** The Census Bureau does not calculate poverty status for those people living in military group quarters or college dormitories.

# Supplemental Security Income (SSI)

## Introduction

This section focuses on the percentage of non-institutionalized working-age people (ages 21 to 64) with disabilities who receive Supplemental Security Income (SSI) payments in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary. Please note that these results will differ from official Social Security Administration reports for several reasons. For additional information, please email [DisabilityStatistics@cornell.edu](mailto:DisabilityStatistics@cornell.edu).

## Quick Statistics

SSI Recipients: with disability **19.2%**

- In 2018, the percentage of working-age people with disabilities receiving Supplemental Security Income payments in IL was 19.2 percent.
- In 2018, the number of working-age people with disabilities receiving Supplemental Security Income payments in IL was 124,000.
- Among the six types of disabilities identified in the ACS, the highest percentage that received SSI was people with "Self-Care Disability," 30.2 percent. The lowest percentage that received SSI was people with "Hearing Disability," 11.9 percent.

## Percentage of non-institutionalized working-age people (ages 21 to 64) with disabilities who receive Supplemental Security Income (SSI) payments in Illinois in 2018

# Education

## High School Diploma/Equivalent

### Introduction

This section explores the percentage of non-institutionalized working-age people (ages 21 to 64) with disabilities with only a high school diploma or equivalent in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

### Quick Statistics

High School  
Only: with  
disability  
**32.7%**

High School  
Only: without  
disability  
**23.4%**

- In 2018, the percentage of working-age people with disabilities with only a high school diploma or equivalent in IL was 32.7 percent.
- In 2018, the percentage of working-age people without disabilities with only a high school diploma or equivalent in IL was 23.4 percent.
- The difference in the percentage with only a high school diploma or equivalent between working-age people with and without disabilities was 9.3 percentage points.
- Among the six types of disabilities identified in the ACS, the highest percentage with only a high school diploma or equivalent was for people with "Independent Living Disability," 35.5 percent. The lowest percentage with only a high school diploma or equivalent was for people with "Visual Disability," 27.6 percent.

## Percentage of non-institutionalized working-age people (ages 21 to 64) with only a high school diploma or equivalent by disability status in IL in 2018

# Education

## Some College/Associate's Degree

### Introduction

This section examines the percentage of non-institutionalized working-age people (ages 21 to 64) with disabilities with only some college or an Associate's degree in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

### Quick Statistics

Some  
College: with  
disability  
**32.9%**

Some  
College:  
without  
disability  
**29.9%**

- In 2018, the percentage of working-age people with disabilities with only some college or an Associate's degree in IL was 32.9 percent.
- In 2018, the percentage of working-age people without disabilities with only some college or an Associate's degree in IL was 29.9 percent.
- The difference in the percentage with only some college or an Associate's degree between working-age people with and without disabilities was -3 percentage points.
- Among the six types of disabilities identified in the ACS, the highest percentage with only some college or an Associate's degree was for people with "Visual Disability," 34.5 percent. The lowest percentage with only some college or Associate's degree was for people with "Cognitive Disability," 30.1 percent.

## Percentage of non-institutionalized working-age people (ages 21 to 64) with only some college or an Associate's degree by disability status in Illinois in 2018

# Education

## Bachelor's Degree or More

### Introduction

This section presents the percentage of non-institutionalized working-age people (ages 21 to 64) with disabilities with a Bachelor's degree or more in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

### Quick Statistics

Bachelor's  
Degree or  
More: with  
disability

**17.2%**

Bachelor's  
Degree or  
More: without  
disability

**38.7%**

- In 2018, the percentage of working-age people with disabilities with a Bachelor's degree or more in IL was 17.2 percent.
- In 2018, the percentage of working-age people without disabilities with a Bachelor's degree or more in IL was 38.7 percent.
- The difference in the percentage with a Bachelor's degree or more between working-age people with and without disabilities was 21.5 percentage points.
- Among the six types of disabilities identified in the ACS, the highest percentage with a Bachelor's degree or more was for people with "Hearing Disability," 21.8 percent. The lowest percentage with a Bachelor's degree or more was for people with "Independent Living Disability," 11.2 percent.

## Percentage of non-institutionalized working-age people (ages 21 to 64) with a Bachelor's degree or more by disability status in Illinois in 2018

# Veterans Service-Connected Disability Rating

## Introduction

This section presents the percentage of non-institutionalized working-age (ages 21 to 64) civilian veterans reporting a service-connected disability rating in Illinois. The 2018 American Community Survey (ACS) asks if the veteran has a service-connected disability, and if so, what their rating is (0-100%). A "service-connected" disability is one that has been determined by the Department of Veterans Affairs (VA) as being a result of disease or injury incurred or aggravated during military service. Note that a veteran can receive disability compensation for a wide range of conditions, and a veteran with a service-connected disability may not report having one of the six ACS functional or activity limitation disabilities. For definitions of terms, see Glossary.

## Quick Statistics

Veterans with a  
Service-Connected  
Disability  
**21.7%**

- In 2018, there were 251,100 working-age civilian veterans in IL, of whom 54,500 had a VA service-connected disability.
- In 2018, the percentage of working-age civilian veterans in IL with a VA service-connected disability was 21.7 percent.
- In 2018, 19,100 working-age civilian veterans in IL had the most severe service-connected disability rating (70 percent or above).
- In 2018, 35.1 percent of the working-age civilian veterans in IL who had a service-connected disability had a service-connected disability rating of 70 percent or above.

## Disability rating of working-age civilian veterans (ages 21 to 64) with a service-connected disability in Illinois in 2018

Service-Connected Disability	%	MOE	Number	MOE	Base Pop.	Sample Size
Has a service-connected disability rating (0-100%)	21.7	1.89	54,500	5,340	251,100	2,705
<b>Disability rating of veterans with a service connected-disability</b>						
0 percent	6.7	2.45	3,700	1,390	54,500	569
10 or 20 percent	25.0	4.25	13,600	2,670	54,500	569
30 or 40 percent	14.9	3.49	8,100	2,070	54,500	569
50 or 60 percent	13.6	3.36	7,400	1,980	54,500	569
70 percent or higher	35.1	4.68	19,100	3,170	54,500	569
Rating not reported	4.6	2.06	2,500	1,150	54,500	569

# Health Insurance Coverage

## Introduction

This section examines the health insurance coverage of non-institutionalized working-age people (ages 21 to 64) with disabilities in Illinois, using data from the 2018 American Community Survey (ACS). For definitions of terms, see Glossary.

## Quick Statistics

Health  
Coverage:  
with Disability  
**93.0%**

Health  
Coverage:  
without  
Disability  
**89.7%**

- In 2018, 93.0 percent of working-age people with disabilities in IL had some type of health insurance coverage.
- In 2018, 89.7 percent of working-age people without disabilities in IL had some type of health insurance coverage.
- The difference in the health insurance coverage rate between working-age people with and without disabilities was 3.3 percentage points.
- Among the six types of disabilities identified in the ACS, the highest health insurance coverage rate was for people with "Cognitive Disability," 94.5 percent. The lowest health insurance coverage rate was for people with "Visual Disability," 90.8 percent.

## Health insurance coverage of non-institutionalized working-age people (ages 21 to 64) by disability status in Illinois in 2018

Disability Type	%	MOE	Number	MOE	Base Pop.	Sample Size
No Disability	89.7	0.27	5,979,500	40,820	6,664,000	63,496
Any Disability	93.0	0.73	601,200	17,340	646,600	6,709
Visual	90.8	1.85	116,900	7,800	128,800	1,177
Hearing	92.0	1.81	108,800	7,530	118,300	1,261
Ambulatory	94.3	0.95	296,900	12,340	315,000	3,295
Cognitive	94.5	1.00	259,200	11,550	274,400	2,725
Self-Care	94.1	1.56	112,100	7,640	119,100	1,221
Independent Living	94.4	1.07	228,900	10,870	242,500	2,576

# Type of Health Insurance Coverage

## Introduction

This section examines the type of health insurance coverage for non-institutionalized working-age people (ages 21 to 64) with disabilities in Illinois, using data from the 2018 American Community Survey (ACS). Note that people can report more than one type of insurance coverage. For definitions of terms, see Glossary.

## Quick Statistics

Coverage  
through  
Employer/Union:  
with Disability

**38.2%**

Coverage  
through  
Employer/Union:  
without  
Disability

**70.1%**

- In 2018, 38.2 percent of working-age people with disabilities in IL reported health insurance coverage through a current or former employer or union (theirs or another family member).
- In 2018, 70.1 percent of working-age people without disabilities in IL reported health insurance coverage through a current or former employer or union (theirs or another family member).
- In 2018, 9.0 percent of working-age people with disabilities in IL reported purchasing health insurance coverage directly from an insurance company (by themselves or another family member).
- In 2018, 22.5 percent of working-age people with disabilities in IL reported Medicare coverage and 42.2 percent reported Medicaid coverage (or other government-assistance plan for those with low incomes or a disability).

## Type of health insurance coverage of non-institutionalized working-age people (ages 21 to 64) by disability status in Illinois in 2018

Disability Status/ Insurance Type	%	MOE	Number	MOE	Base Pop.	Sample Size
<b>Any Disability</b>						
Uninsured	7.0	0.73	45,400	4,870	646,600	6,709
Employer/Union	38.2	1.38	247,200	11,280	646,600	6,709
Purchased	9.0	0.82	58,300	5,520	646,600	6,709
Medicare	22.5	1.19	145,700	8,700	646,600	6,709
Medicaid	42.2	1.41	272,800	11,840	646,600	6,709
Military/VA	4.6	0.60	30,000	3,960	646,600	6,709
Indian Health Service	0.0	3.29	100	400	646,600	6,709
<b>No Disability</b>						
Uninsured	10.3	0.27	684,600	18,440	6,664,000	63,496
Employer/Union	70.1	0.41	4,672,500	39,420	6,664,000	63,496
Purchased	10.3	0.27	684,400	18,440	6,664,000	63,496
Medicare	1.3	3.29	89,500	6,830	6,664,000	63,496
Medicaid	11.2	0.28	746,000	19,200	6,664,000	63,496
Military/VA	1.6	3.29	109,200	7,540	6,664,000	63,496
Indian Health Service	0.0	3.29	2,200	1,080	6,664,000	63,496

# Glossary

## Actively Looking for Work

A person is defined as ACTIVELY looking for work if he or she reports looking for work during the last four weeks.

## Ambulatory Disability

This disability type is based on the question (*asked of persons ages 5 or older*): Does this person have serious difficulty walking or climbing stairs?

## Base Population (Base Pop.)

The estimated number of individuals upon which the calculation is based. (For percentages, this is the denominator).

## Cognitive Disability

This disability type is based on the question (*asked of persons ages 5 or older*): Because of a physical, mental, or emotional condition, does this person have serious difficulty concentrating, remembering, or making decisions?

## Disability and Disability Types

The ACS definition of disability is based on six questions. A person is coded as having a disability if he or she or a proxy respondent answers affirmatively for one or more of these six categories.

- Hearing Disability (*asked of all ages*): Is this person deaf or does he/she have serious difficulty hearing?
- Visual Disability (*asked of all ages*): Is this person blind or does he/she have serious difficulty seeing even when wearing glasses?
- Cognitive Disability (*asked of persons ages 5 or older*): Because of a physical, mental, or emotional condition, does this person have serious difficulty concentrating, remembering, or making decisions?
- Ambulatory Disability (*asked of persons ages 5 or older*): Does this person have serious difficulty walking or climbing stairs?
- Self-care Disability (*asked of persons ages 5 or older*): Does this person have difficulty dressing or bathing?
- Independent Living Disability (*asked of persons ages 15 or older*): Because of a physical, mental, or emotional condition, does this person have difficulty doing errands alone such as visiting a doctor's office or shopping?

## Earnings

Earnings are defined as wages, salary, commissions, bonuses, or tips from all jobs including self-employment income (NET income after business expenses) from own nonfarm businesses or farm businesses, including proprietorships and partnerships.

## Education

Our definition is based on the responses to the question: "What is the highest degree or level of school this person has completed? If currently enrolled, mark the previous grade or highest degree received." Our category "high school diploma/equivalent" includes those marking the ACS option "Regular high school diploma — GED or alternative credential." Our category "Some college/Associate's degree" includes those marking the ACS options: some college credit, but less than 1 year of college credit; one or more years of college credit but no degree, or "Associate's degree (for example: AA, AS)." Our category "a Bachelor's or more" includes those marking the ACS options: "Bachelor's degree (for example: BA, BS)"; "Master's degree (for example: MA, MS, MEng, MEd, MSW, MBA)"; "Professional degree (for example: MD, DDS, DVM, LLB, JD)"; or "Doctorate degree (for example: PhD, EdD)." Note in 2008 changes were made to some of the response categories and the layout of this question.

## Employment

A person is considered employed if he or she is either

- a. "at work": those who did any work at all during the reference week as a paid employee (worked in his or her own business or profession, worked on his or her own farm, or worked 15 or more hours as an unpaid worker on a family farm or business) or
- b. "with a job but not at work": had a job but temporarily did not work at that job during the reference week due to illness, bad weather, industrial dispute, vacation or other personal reasons. The reference week is defined as the week preceding the date the questionnaire was completed.

## Employment Rate

The employment rate is calculated by dividing the number of persons employed by the number of persons in that population.

\*\* Note that the unemployment rate cannot be calculated using the employment rate:

- The employment rate is the percentage of all persons who have a job.
- The unemployment rate is the percentage of persons in the labor force who do not have a job but are actively looking for work. The labor force includes people who have a job, are on layoff, or who actively searched for work in the last four weeks.

Please see <http://www.disabilitystatistics.org/faq.cfm#Q6> for more information on unemployment rate calculation and its implications.

## Full-Time/Full-Year Employment

A person is considered employed full-time/full-year if he or she worked 35 hours or more per week (full-time) and 50 or more weeks per year (full-year). The reference period is defined as the year preceding the date the questionnaire was completed. Note: this does not signify whether a person is eligible for fringe benefits. The question and response categories regarding weeks worked per year was changed in 2008.

## Group Quarters (GQ)

A GQ is a place where people live or stay that is normally owned or managed by an entity or organization providing housing and/or services for the residents. These services may include custodial or medical care as well as other types of assistance, and residency is commonly restricted to those receiving these services. People living in group quarters are usually not related to each other. Group quarters include such places as college residence halls, residential treatment centers, skilled nursing facilities, group homes, military barracks, correctional facilities, and workers' dormitories. See the definitions of institutional GQs and non-institutional GQs for more information. In addition, a description of the types of group quarters included in the 2008 ACS is located on the U.S. Census Bureau's Web site at [www.census.gov/acs/www/Downloads/2008\\_ACS\\_GQ\\_Definitions.pdf](http://www.census.gov/acs/www/Downloads/2008_ACS_GQ_Definitions.pdf).

## Health Insurance Coverage

Is based on the following question: Is this person CURRENTLY covered by any of the following types of health insurance or health coverage plans? Mark "Yes" or "No" for EACH type of coverage in items a – h.

- a. Insurance through a current or former employer or union (of this person or another family member)
- b. Insurance purchased directly from an insurance company (by this person or another family member)
- c. Medicare, for people 65 and older, or people with certain disabilities
- d. Medicaid, Medical Assistance, or any kind of government-assistance plan for those with low incomes or a disability
- e. VA (including those who have ever used or enrolled for VA health care)
- f. TRICARE or other military health care
- g. Indian Health Service
- h. Any other type of health insurance or health coverage plan – Specify (Note: "Other type" were recoded into one of the categories a-g by the Census Bureau)

## Hearing Disability

This disability type is based on the question (*asked of all ages*): Is this person deaf or does he/she have serious difficulty hearing?

## Hispanic or Latino Origin

People of Hispanic or Latino origin are those who classify themselves in a specific Hispanic or Latino category in response to the question, "Is this person Spanish/Hispanic/Latino?" Specifically, those of Hispanic or Latino origin are those who are Cuban; Mexican, Mexican American, Chicano; Puerto Rican; or other Spanish/Hispanic/Latino. Origin may be the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. People who identify their origin as Spanish, Hispanic, or Latino may be of any race.

## Household Income

Household Income is defined as the total income of a household including: wages, salary, commissions, bonuses, or tips from all jobs; self-employment income (NET income after business expenses) from own non-farm or farm businesses, including proprietorships and partnerships; interest, dividends, net rental income, royalty income, or income from real estates and trusts; Social Security or Railroad Retirement; Supplemental Security Income; any public assistance or welfare payments from the state or local welfare office; retirement, survivor or disability pensions; and any other regularly received income (e.g., Veterans' payments, unemployment compensation, child support or alimony). Median household income is calculated with the household as the unit of analysis, using household weights without adjusting for household size.

## Independent Living Disability

This disability type is based on the question (*asked of persons ages 15 or older*): Because of a physical, mental, or emotional condition, does this person have difficulty doing errands alone such as visiting a doctors office or shopping?

## Institutional Group Quarters (GQs)

Includes facilities for people under formally authorized, supervised care or custody at the time of enumeration. Generally, restricted to the institution, under the care or supervision of trained staff, and classified as "patients" or "inmates." Includes: correctional, nursing, and in-patient hospice facilities, psychiatric hospitals, juvenile group homes and residential treatment centers.

## Margin of Error (MOE)

Data, such as data from the American Community Survey, is based on a sample, and therefore statistics derived from this data are subject to sampling variability. The margin of error (MOE) is a measure of the degree of sampling variability. In a random sample, the degree of sampling variation is determined by the underlying variability of the phenomena being estimated (e.g., income) and the size of the sample (i.e., the number of survey participants used to calculate the statistic). The smaller the margin of error, the lower the sampling variability and the more "precise" the estimate. A margin of error is the difference between an estimate and its upper or lower confidence bounds. Confidence bounds are calculated by adding the MOE to the estimate (upper bound) and subtracting the MOE from the estimate (lower bound). All margins of error in this report are based on a 90 percent confidence level. This means that there is a 90% certainty that the actual value lies somewhere between the upper and lower confidence bounds.

## Non-Institutional Group Quarters (GQs)

Includes facilities that are not classified as institutional group quarters; such as college/university housing, group homes intended for adults, residential treatment facilities for adults, workers' group living quarters and Job Corps centers and religious group quarters.

## **Not Working but Actively Looking for Work**

A person is defined as not working but actively looking for work if he or she reports not being employed, but has been looking for work during the last four weeks.

## **Number**

This term appears in the tables; it refers to estimated number of people in the category. (for percentages, this is the numerator).

## **Poverty**

The poverty measure is computed based upon the standards defined in Directive 14 from the Office of Management and Budget. These standards use poverty thresholds created in 1982 and index these thresholds to 2008 dollars using poverty factors based upon the Consumer Price Index. They use the family as the income sharing unit and family income is the sum of total income from each family member living in the household. The poverty threshold depends upon the size of the family; the age of the householder; and the number of related children under the age of 18.

## **Race**

Race categories are based on the question, "[w]hat is this person's race? Mark (X) one or more races to indicate what this person considers himself/herself to be." Responses include the following: White; Black or African-American; American Indian or Alaska Native (print name of enrolled or principal tribe); Asian Indian; Chinese; Filipino; Japanese; Korean; Vietnamese; Other Asian (Print Race); Native Hawaiian; Guamanian or Chamorro; Samoan; Other Pacific Islander (Print Race Below); Some other race (print race below). "Other race" also contains people who report more than one race.

## **Sample Size**

The number of survey participants used to calculate the statistic.

## **Self-care Disability**

This disability type is based on the question (*asked of persons ages 5 or older*): 17c. Does this person have difficulty dressing or bathing?

## **Supplemental Security Income (SSI)**

A person is defined as receiving SSI payments if he or she reports receiving (SSI) income in the 12 months prior to the survey.

**Note:** The Supplemental Security Income (SSI) does not apply to Puerto Rico. SSI is a federal cash assistance program that provides monthly payments to low-income aged, blind, or disabled persons in the 50 states, the District of Columbia, and the Northern Mariana Islands.

## Veteran Service-Connected Disability

A disease or injury determined to have occurred in or to have been aggravated by military service. A disability is evaluated according to the VA Schedule for Rating Disabilities in Title 38, CFR, and Part 4. Extent of disability is expressed as a percentage from 0% (for conditions that exist but are not disabling to a compensable degree) to 100%, in increments of 10%. This information was determined by the following two part question:

a. **Does this person have a VA service-connected disability rating?**

Yes (such as 0%, 10%, 20%, ... , 100%)

No *SKIP* to question 28a

b. **What is this person's service-connected disability rating?"**

Responses included: 0 percent; 10 or 20 percent; 30 or 40 percent; 50 or 60 percent; 70 percent or higher

## Visual Disability

This disability type is based on the question: (*asked of all ages*): Is this person blind or does he/she have serious difficulty seeing even when wearing glasses?

# About the Disability Status Reports

The Cornell University Disability Status Reports is produced and funded by the Yang-Tan Institute at the Cornell University ILR School. This effort originated as a product of the Rehabilitation Research and Training Center on Disability Demographics and Statistics (StatsRRTC) funded to the Yang-Tan Institute in the ILR School at Cornell University by the U.S. Department of Education, National Institute on Disability and Rehabilitation Research (grant No. H133B031111).

The contents of this report do not necessarily represent the policy of the Department of Education, and you should not assume endorsement by the Federal Government (Edgar, 75.620 (b)).
